DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because the reference characters used in the amended drawing sheets filed September 7, 2004 are not mentioned in the description. The amended drawing sheets are otherwise acceptable.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al in view of Miura. Walker et al discloses the claimed invention as stated above

Art Unit: 3747

except for playing the game with trained characters having changing abilities. Miura teaches that it is known to provide a multi-player game using trained characters having changing abilities. See column 5, line 63, to column 6, line 7, and column 9, lines 48-51. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the network game system of Walker et al to have a game played with trained characters having changing abilities, as taught by Miura, in order to provide more versatile game simulations.

Allowable Subject Matter

Claims 1-3, 5 and 8-12 are allowed.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive insofar as they pertain to claims 4, 6 and 7. The arguments are not commensurate with the scope of the claims. There is nothing in claims 4, 6 and 7 that requires a threshold level of capability to be used to determine whether or not a player can enter a competition

Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3747

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
